

In 2006, Antibiotice took decisive and responsible steps towards a continual and sustainable development. This year's remarkable results in various areas such as quality, research, environmental protection, or stock market can be united, emblematically, under the title "a year under the sign of plus".

Apart from the investments exceeding 5 million euros directed to the development of manufacturing processes, implementation of the Integrated Management System, and environment-related projects, one must appreciate the extraordinary human effort involved in business consolidation and maintenance of the company among the top 10 most important pharmaceutical producers in Romania.

The economic results of 2006 materialized in the increase of the turnover to 196 million RON lei, (by 20% higher y-o-y) and enhancement of the gross profit to 30 million RON (by 27% higher than in 2005). Moreover, the constant upward evolution of the company enhanced company attractiveness among investors on the stock market, which resulted, at the end of 2006, to a market capitalization twice as high as at the end of 2005: 228 million euros.
