

The ascending trend reached by our company for the last few years made Antibiotice continue its mission to respect and protect life.

By four distinct sectors for conditioned products and two biosynthesis flow sheets, Antibiotice obtained during the last years certificates Good Manufacturing Practice (GMP) for the whole technological platform. Nowadays, Antibiotice is also the only pharmaceutical company in Romania which has functional capacities for biosynthesis (Nystatin and Vitamin B12). The company specialists' efforts made that Nystatin definitely imposed on the internal and the external market due to the quality standards in accordance with the most exigent conditions of International Pharmacopeias.

In 2003 Antibiotice obtained the "Title of Excellency in health production", a distinction awarded by the General Assembly of Romania's Industrialists, UGIR – 1903.
