box x 1 tube x 35g;
box x 1 tube x 20g;
box x 1 tube x 30g;

Shelf life
3 years (4 months after opening) (zone II)

Benefits

- ☐ broad antifungal spectrum, by inhibiting ergosterol biosynthesis
- ☐ extensive medical practice for over 50 years, with good safety profile
- ☐ clotrimazole applied topically is unlikely to lead to measurable systemic effects or side effects
- ☐ therapeutic guidelines recommend topical clotrimazole as a 1st line treatment for:
 - candida skin infection
 - vaginal candidiasis
 - fungal skin infections - body and groin area
 - fungal skin infection - foot
 - *Pityriasis versicolor*

How does it help you

- ☐ Treatment of cutaneous and mucosal mycoses caused by dermatophytes, fungi, yeasts and microorganisms such as *Malassezia furfur* and skin infections caused by *Corynebacterium minutissimum*.
- ☐ Skin diseases caused by fungi and overinfected: interdigital mycoses (*Tinea pedum*, *Tinea manuum*), cutaneous mycoses (*Tinea corporis*, *Pityriasis versicolor*), mycoses of the skin folds (*Tinea inguinalis*, erythrasma), paronychia in onychomycosis (*Tinea unguium*).

Clinical study:

- ☐ Randomized, parallel design, multiple-site study to evaluate the non-inferiority of generic Clotrimazole 10mg/g cream (Antibiotice SA) compared to reference drug in patients with *Tinea pedis*.

Reference product:

- ☐ Canesten® 10 mg/g cream, Bayer

Dossier availability:

- ☐ EUeCTD Generic application

How to use:

- ☐ The cream should be applied thinly 2-3 times daily and rubbed in gently.
- ☐ Duration of treatment:
 - dermatomycosis: 3-4 weeks;
 - erythrasma: 2-4 weeks;
 - pityriasis versicolor: 1-3 weeks;
 - vulvitis and candidal balanitis: 1-2 weeks.
- ☐ Overinfected seborrheic dermatitis, chin deep folliculite, favus, fungal vulvitis
- ☐ Nonspecific vulvitis, inflammation of the penile gland and candidal balanitis.

Composition

Active ingredients

clotrimazole 10 mg/g

Clotrimazol Atb®
cream

Therapeutic class
Dermatologicals

Therapeutic area
antibiotics for topical use

Product type
OTC (over the counter)

Pharmaceutical form
ointment

Packaging
Box x 1 tube x 20 g

Shelf life
3 years (4 months after opening) (zone II)

Benefits

- ☐ double antibiotic ointment with broad antibacterial spectrum
- ☐ fast acting and long lasting
- ☐ effectiveness in achieving clinical goals
- ☐ formulated as an ointment helps keep the moisture at the site of the wound with multiple benefits:
 - helps the migration of keratinocytes
 - facilitates the reepithelialization
 - reduces the healing time and the local pain
 - facilitates the autolytic debridement
 - decreases the incidence of wound infections
 - reduces the risk of scarring

How does it help you

- ☐ Zinba® ointment is indicated for the treatment and prophylaxis of skin infections caused by bacteria sensitive to neomycin and bacitracin:
 - Localised cutaneous bacterial infections such as furuncles, infected crural ulcer, infected stasis ulcers, hidradenitis suppurativa, perioral staphyloderma, carbuncles, impetigo, superinfected eczema, sycosis, paronychia.
 - Bacterial infections of lesions: by cut or abrasion, post-surgical, skin grafts.
 - Prophylactic for cut injuries (including post-surgical), abrasions, burns.

Composition

Active ingredients	
Bacitracin-Zinc	250 IU
Neomycin Sulphate	5000 IU

Reference product:

- ☐ Baneocin® 250 IU/5000 IU/g ointment, Sandoz

Dossier availability:

- ☐ EUeCTD Hybrid application

How to use:

- ☐ The ointment should be applied thinly 2-4 times daily and rubbed in gently.
Suitable for adults and children from 2 years old.

Zinba® ointment

M | **Musculo-Skeletal system**

Therapeutic class
Musculo-skeletal system

Therapeutic area
Topical products for joint and muscular pain

Product type
OTC

Pharmaceutical form
Gel

Packaging
Box x 1 tube x 40, 100 g

Shelf life
3 years (zone II)

Benefits

- ☐ Rapid absorption into the skin by massage, FAST-acting
- ☐ Emulsified gel with lipophilic, emollient components emulsified in a gel base
- ☐ Moisturising formula with emollient excipients and soothing lavender oil
- ☐ Good tolerability and increased patient compliance
- ☐ Allows high concentrations of active substances at the application site.
- ☐ Low systemic absorption and high tissue penetration
- ☐ Can be used as a coupling agent in ultrasound treatment.

Compositon

- ☐ One gram of gel contains diclofenac diethylamine 11.6

Therapeutic indications:

- ☐ *Adults and adolescents over 14 years old:*
For relief of pain, swelling and edema in:
 - Soft tissue trauma: tendons, ligaments, muscles and joints (e.g. sprains, strains, bruises, back pain);
 - Localised forms of joint rheumatism: tendonitis (e.g. lateral epicondylitis), bursitis,
 - Shoulder-hand syndrome and periarthritits;
- ☐ *For adults over 18 years of age:*
 - For pain relief in localized, mild-moderate forms of rheumatism
 - Degenerative rheumatism, e.g. peripheral osteoarthritis (fingers, knees) or the spine.

How to use:

- ☐ It is recommended to apply the medicine to the affected area 3 or 4 times a day.
Massage gently, until completely absorbed.

Clafen® rapid 11.6 mg/g

Musculo-skeletal system

**Therapeutic area**

Antiinflammatory and antirheumatic products, non-steroids

**Product type**

OTC

**Pharmaceutical form**

Film-coated tablets

**Packaging**

Box x 16 lozenges

**Shelf life**

2 years (zone II)

Benefits:

- ☐ **Ibufen® Rapid 400 mg** (as L-arginine salts) allows solubilization of ibuprofen and ensures excellent and prompt absorption of the active ingredient after oral administration.
- ☐ Ensures relief from the most common types of pain: headaches, toothaches, dysmenorrhea, muscle and joint pain.

Therapeutic indications:

- ☐ **Ibufen® Rapid** is indicated for the relief of pain of various causes such as headache, toothache, neuralgia, muscle and joint pain and dysmenorrhea. As an adjuvant in the symptomatic treatment of fever and flu.

Compositon

Each film-coated tablet contains ibuprofen 400 mg (as L-arginine salts).

How to use:

- ☐ **Adults and children over 12 years of age:** 1 film-coated tablet two to three times a day. The maximum daily dose should not exceed 1200 mg per day.

Therapeutic indications:

- ☐ Ibufen® Baby 20 mg/mL is recommended for short-term symptomatic treatment of:

- mild to moderate pain
- fever

Ibufen® Baby 20 mg/ml oral suspension is indicated in children and infants 3 months of age and older.

How to use:

- ☐ For children aged 3 months to 12 years, the recommended daily dose of ibuprofen is 20-30 mg per kg body weight (1-1.5 ml per kg body weight), divided into 3-4 doses.

Compositon

One milliliter of oral suspension contains ibuprofen 20 mg

Ibufen® Baby 20 mg/mL

The background of the slide features a light gray pattern of interconnected hexagons and lines, resembling a molecular or network structure. The lines are thin and gray, while the hexagons are slightly darker and more prominent.

granules for oral solution in sachets

Packaging
Box x 8 sachets

Shelf life
2 years (zone II)

Benefits

- ☐ RemiFLU® is recommended for symptomatic treatment of common colds, flu and allergic and vasomotor rhinitis.

Compositon

Active ingredients	Quantity/1 sachet (mg)
Paracetamol	500
Chlorpheniramine maleate	4
Ascorbic acid	200

How does it help you

Efficient and fast relief of symptoms:

- ☐ sneezing,
- ☐ rhinorrhea,
- ☐ nasal and sinus congestion,
- ☐ fever,
- ☐ cephalalgia and muscle pain

How to use:

- ☐ **Adults and teenagers (over 15 years of age): 1 sachet of Remiflu 2-3 times a day.**
The interval between administrations must be at least 4 hours.
The content of each sachet is administered with a sufficient amount of hot water.

RemiFLU® granules for oral solution in sachets

Vitamins and minerals

Product type
Food supplement

Pharmaceutical form
Capsules

Packaging
Box x 10, 30, 60
capsules

Shelf life
3 years (zone II)

Benefits

- ☐ The optimal combination of magnesium (organic salt (lactate) with high absorption) and vitamin B6 which is an enzyme cofactor supports the absorption of magnesium in the body.

Compositon

Active ingredients	Quantity/ 1 capsule (mg)	% NRV* 2 capsules
Magnesium (as magnesium lactate dihydrate 425g)	43,5	_**
Vitamin B6 (Pyridoxine hydrochloride)	5	83,3

* % NRV - percent of the nutrient reference value

How to use:

- ☐ **Adults are recommended 2 capsules of Equilibra® per day**, during the main meal, with a sufficient amount of liquid.

How does it help you

- ☐ Association of magnesium with vitamin B6, in the food supplement Equilibra® is based on the cumulation of the beneficial effects of the two elements, especially in the nerve cell, being involved in the normal functioning of the body. Vitamin B6 favors the absorption and maintenance of magnesium in the body. Deficiency of magnesium and vitamin B6 can be manifested by lack of energy, constant fatigue, changes in mood and agitation.

Magnesium contributes to:

- reducing fatigue and exhaustion;
- normal functioning of the nervous system;
- maintaining mental health;
- normal functioning of the muscular system;
- maintaining the health of the bone system;
- normal energy metabolism.

Vitamin B6 contributes to:

- normal formation of red blood cells;
- normal functioning of the immune system;
- regulation of hormonal activity;
- normal metabolism of proteins and glycogens.

Equilibra® capsules

Energy for every single day

Therapeutic class

and metabolism

Therapeutic area
Vitamins and minerals

Product type
Food supplement

Pharmaceutical form
Coated tablets

Packaging
Box x 10, 30, 60
capsules

Shelf life
3 years (zone II)

Benefits

- Association of the two organic magnesium salts, with increased bioavailability and absorption but also with good gastrointestinal tolerability - magnesium bisglycinate and magnesium malate - along with Vitamin B6 potentiates the beneficial effects. Their synergistic action contributes to the normal functioning of the nervous system and to maintaining the mental health, normal energy metabolism, normal synthesis and metabolism of proteins and to reducing fatigue and tiredness.

Compositon

Active ingredients	Quantity/ 1 coated tablet (mg)	% NRV* 2 coated tablet
Magnesium (from magnesium malate trihydrate and magnesium bisglycinate)	110	29.3
Vitamin B6	2.5	178.5

* % NRV - percent of the nutrient reference value

How to use:

- One coated tablet per day is taken orally, preferably in the morning.

How does it help you

- **Magnesium** is considered to be the mineral with vital roles because it is stored and used by: myocardium, skeletal musculature, brain, liver, kidneys, hemolymphatic system, thyroid and other exocrine and endocrine glands.
- **Vitamin B6** is one of 8 vitamins B that the body needs, it supplements the intake of magnesium in the cells and contributes to its intracellular fixation.

Magnesium contributes to:

- normal functioning of the muscular system;
- maintaining the health of the bone system (a necessary element for the development and mineralization of bones, formation of collagen and cartilages, regulation of calcium levels in cells);
- cofactor in a variety of energy functions, balancing the energy needed by the body every day.

Vitamin B6 contributes to:

- supplementing the intake of magnesium in the cells and contributing to its intracellular fixation;
- essential nutrient for processes such as brain development and oxygen transport through the bloodstream;
- maintaining the mental health and reducing fatigue and tiredness;
- the production of serotonin (a hormone that improves the mood);
- helping the body to regulate the level of homocysteine in the blood, improving the mental performance.

gastro-resistant tablets

Shelf life
3 years (zone II)

Benefits

- ☐ **Enzistim®**, with its complex composition, mimics the function of natural enzymes, helping to break down carbohydrates, fats, and proteins from food, thereby **preventing malabsorption** and **digestive discomfort**.
- ☐ This dietary supplement, thanks to its formulation, is **protected from gastric acidity** and thus acts at the duodenal level, ensuring complete and easy digestion

How does it help you

- ☐ It is a food supplement that contributes to:
 - the normal functioning of the digestive tract, supporting digestion and physical well-being
 - improving lactose digestion in people who have difficulty digesting lactose
 - the absorption of complex carbohydrates from food by reducing fermentation processes and avoiding gas production
 - the proper digestion of proteins, lipids, and carbohydrates

Compositon

Active ingredients	Quantity/ 1 gastro-resistant tablet (mg)	% NRV*
Pancreatine (protease 36500 USP, amylase 37.500 USP, lipase 3000 USP)	250	_**
Bromelain - from stem pineapple extract (<i>Ananas comosus</i>) 240.5 GDU	96.2	_**
Ginger root extract 5% Gingerols (<i>Zingiber officinale</i>)	50	_**
Alpha-galactosidase (180 GalU)	6	_**
Lactase (Beta-D-Galactosidase) (304 FCC)	3.04	_**

* % NRV - percent of the nutrient reference value; **NRV is not established.

How to use:

For adults, it is recommended to take 1-2 gastro-resistant tablets per day or as needed, during main meal

Benefits

- ☐ Unique, complex, synergistic combination of standardized plant extracts with laxative effect.

Senna Hibiscus Rhubarb Ginger

Compositon

Active ingredients	Quantity/ 1 capsule (mg)	Quantity/ 2 capsules (mg)	% NRV*
Dry hydroalcoholic extract of hibiscus flowers (<i>Hibiscus sabdariffa</i>) standardized in minimum 5% Vitamin C	120	240	15
Dry hydroalcoholic extract of rhubarb root (<i>Rheum palmatum</i>) standardized in minimum 5% rhein	100	200	_**
Dry hydroalcoholic extract of ginger root (<i>Zingiber officinale</i>) standardized in minimum 5% gingerol	100	200	_**
Dry hydroalcoholic extract of senna leaves (<i>Cassia angustifolia</i>) standardized in minimum 20% senosides	37.5	75	_**

* % NRV - percent of the nutrient reference value; **NRV is not established.

How does it help you

- ☐ supports the intestinal peristalsis (*Rheum palmatum*, *Hibiscus sabardiffa*);
- ☐ helps to maintain the regularity of intestinal transit (*Cassia angustifolia*);
- ☐ promotes the absorption of food by stimulating gastric juice, favoring a better digestion of food (*Hibiscus sabardiffa*, standardized in Vitamin C).

How to use:

- ☐ **Children aged over 12, adults and elderly: 2 capsules per day**, preferably in the evening, with a sufficient amount of water. The effect can occur at 6 - 12 hours after administration. If the effect does not occur, another capsule is administered in the morning of the next day. It is not administered for more than 10 consecutive days.

Benefits

- ☐ Through its active ingredients, diversity and high concentration of lactic strains, **SimbiFlora Complex** intervenes in the process of continuous regeneration of the intestinal flora, both in the small and in the large intestine, contributes to the protection of cells against oxidative stress and to the support of endocrine and metabolic functions.

How does it help you

- ☐ contributes to restoring the balance of the intestinal flora;
- ☐ contributes to the protection of cells against oxidative stress;
- ☐ contributes to the normal functioning of the thyroid gland;
- ☐ contributes to maintaining skin health.

How to use:

- ☐ It can be administered to **children aged over 12, adults and the elderly, 1 capsule per day**, with a sufficient amount of water. In the case of antibiotic consumption, 1 capsule per day can be administered, preferably before or after taking antibiotics, at a minimum 2-hour interval. This food supplement can be used in the vegetarian diets.

Menopause

Product type
Food supplement

Pharmaceutical form
Capsules

Packaging
Box x 10, 30, 60
capsules

Shelf life
2 years

Benefits

- ☐ Lumiria® contains two standardized plant extracts and vitamin B6. The combination of ingredients helps control
- ☐ menopause associated manifestations.

How does it help you

- ☐ **Red clover** (*Trifolium pratense L.*), due to the presence of isoflavones, has estrogen-like effects on the body. It relieves menopause associated symptoms (particularly hot flushes) and helps maintain cardiovascular health.
- ☐ Decreased estrogen levels can lead to weight gain, glycemic index and/or blood pressure. Furthermore, it affects the lipid profile, such as cholesterol levels (HDL and LDL). These metabolic disorders can be controlled with **flax** (*Linum usitatissimum L.*) **seed extract standardized in lignans**, polyphenolic compounds.
- ☐ **Vitamin B6** plays an important role in the maintenance of mental health, normal functioning of the nervous system and helps reduce fatigue and exhaustion. Vitamin B6 minimize vasomotor symptoms such as hot flushes and night sweats.

Compositon

Active ingredients	Quantity/ 1 capsule (mg)	% NRV*
Extract from aerial parts of Red Clover (<i>Trifolium pratense</i>) standardized to 40% isoflavones	100	~**
Flax seed extract (<i>Linum usitatissimum L.</i>) standardized to 20% lignans	62,5	~**
Vitamin B6 (Pyridoxine hydrochloride)	3	214,2

* % NRV - percent of the nutrient reference value; **NRV is not established.

How to use:

- ☐ **1 capsule a day** with a sufficient quantity of water, preferably with a meal. Recommended for at least 12 weeks. Lumiria® can be used in vegetarian diets.

When specific manifestations appear: 1 film-coated tablet twice a day for 5-7 days;
MAY BE USED IN COMBINATION WITH ANTIMICROBIAL TREATMENT
 Between episodes with specific manifestations: 1 film-coated tablet per day for up to 14 days.

Urexpert® coated tablets

Therapeutic class
 Genitourinary system and sex hormones

Therapeutic area
 Prostate health

Product type
 Food supplement

Pharmaceutical form
 Film coated tablets

Packaging
 Box x 10, 30, 60 film-coated tablets

Shelf life
 2 years

Benefits

- Urexpert® Pro have a formula designed to support overall prostate health, relieve urinary discomfort, maintain a normal urinary flow and improve a man's quality of life.

How does it help you

Urexpert® Pro contributes to:

- maintaining prostate health
- maintaining urogenital health
- maintaining normal testosterone levels in the blood
- maintaining normal fertility and reproduction
- normal fatty acid metabolism

Compositon

Active ingredients	Quantity/ 1 tablet (mg)	% NRV*
Saw palmetto fruit extract (<i>Serenoa repens</i>) standardized to minimum 45% fatty acids	320	-**
Pumpkin seed extract (<i>Cucurbita pepo</i>) standardized to minimum 25% fatty acids	150	-**
Zinc (zinc lactate dihydrate)	20	200%

* % NRV - percent of the nutrient reference value; **NRV is not established.

How to use:

- 1 tablet a day**, after a meal, with a sufficient quantity of water.
Recommended for at least 3 months.

Urexpert® Pro coated tablets

The background of the slide features a light gray pattern of interconnected hexagons and lines, resembling a molecular or network structure. The lines are thin and gray, while the hexagons are slightly darker and more prominent.

Benefits

- ☐ **Soriso®** contains standardized plant extracts of *Rhodiola rosea* and *Ocimum basilicum*, which help the body to adapt to emotional stress and physical effort.

Compositon

Active ingredients	Quantity/ tablet (mg)	Daily dose (2 tablets)	% NRV*
<i>Rhodiola rosea</i> root extract (rhodiola), standardized to minimum 3% rosavins and minimum 1% salidosides	250	500	_**
<i>Ocimum basilicum</i> leaf extract (basil) standardized to minimum 2% ursolic acid	250	500	_**

* % NRV - percent of the nutrient reference value; **NRV is not established.

How does it help you

Rhodiola rosea

- ☐ helps the body to adapt to emotional stress and physical effort (supports the nervous system);
- ☐ contributes to an optimal mental and cognitive activity.

Ocimum basilicum

- ☐ induces a state of well-being, peace and helps to maintain a good sleep;
- ☐ contributes to an optimal mental and cognitive activity.

How to use:

- ☐ 2 tablets per day, preferably in the morning and/or at lunch. It is administered with a sufficient amount of water, 15 - 30 minutes before meal.

capsules

Shelf life
2 years (zone II)

Benefits

- ☐ Soriso® Luna - together with Soriso®, through an associated administration recommendation (Soriso® - during the day, Soriso® Luna - in the evening, before going to sleep) - represents the ideal solution for adapting to daily stress and relieving sleep disorders.
- ☐ Soriso® Luna gives a state of **relaxation** and **calm**, but much more importantly, the **induction** and **maintenance** of a **natural, restful, restorative sleep**. The benefits are obtained due to the complementary mechanisms of action of the three ingredients: melatonin, *Valeriana officinalis* root extract standardized in minimum 0.8% valerenic acid and L-Theanine.
- ☐ Can be used in vegetarian diets

How does it help you

- ☐ alleviation of sleep disorders
- ☐ reducing the time needed to fall asleep
- ☐ maintaining a natural, restful sleep
- ☐ improving the quality of sleep, regulating the sleep-wake cycle and circadian rhythm
- ☐ reducing irritability/hyperexcitability and inducing relaxation
- ☐ support of well-being in case of stress and tense situations

Compositon

Active ingredients	Quantity/ 1 capsule (mg)	% NRV*
<i>Valeriana officinalis</i> root extract standardized to minimum 0.8% valerenic acid	100	_**
L-Theanine	100	_**
Melatonin	5	_**

* % NRV - percent of the nutrient reference value; **NRV is not established.

How to use:

- ☐ **Adults: 1 capsule per day**, with a sufficient amount of water, preferably in the evening, 30 minutes before going to bed.
To obtain an optimal effect, it is recommended to take Soriso® Luna for 4 but not more of 8 weeks.

Soriso Luna® capsules

Sleep better, smile more!

V03A (ALL OTHER THERAPEUTIC PRODUCTS)

Therapeutic area
Immunity

Product type
Food supplement

Pharmaceutical form
Coated tablets

Packaging
Box x 10, 30, 60 coated tablets

Shelf life
3 years (zone II)

Benefits

The synergistic action of the bioactive components in the original formula Imunofix® has a beneficial effect on your immunity, because you need to function at maximum capacity every day!

- ☐ **Zn - Zinc** protects the cells against oxidative stress and is considered an antioxidant. Zinc is required for the development and functioning of immune cells in the innate and the adaptive immune system. It is found in many tissues in the body, including bones, teeth, skin, liver, muscles, leukocytes.
- ☐ **Echinacea** - 2 extracts (*Echinaceea purpurea* and *Echinaceea angustifolia*) standardized to **olyphenols** and **echinacoside** which are substances with a role in supporting the activity of the immune system.
- ☐ **Hibiscus** - standardized extract to minumum 5% vitamin C supports the immune system and cellular energy mechanisms. Thus, it contributes in reducing fatigue and tiredness in the body. Vitamin C is not produced in the human body, so we need it from external sources.

How does it help you

It contributes to:

- ☐ normal functioning of the immune system;
- ☐ protecting cells against oxidative stress;
- ☐ reducing fatigue and tiredness;
- ☐ shortening the body's recovery period;
- ☐ maintaining the health of the respiratory system

Compositon

Active ingredients	Quantity/ 1 coated tablet (mg)	% NRV*
Dried hibiscus flower extract (<i>Hibiscus sabdariffa</i>) standardized to minimum 5% Vitamin C	270	33,75
Dry extract from the aerial part of Echinacea (<i>Echinacea purpurea</i>) standardized to minimum 4% polyphenols	250	_ **
Dry extract of echinacea root (<i>Echinacea angustifolia</i>) standardized to minimum 4% echinacosides	250	_ **
Zinc (as zinc lactate dihydrate 42.75 mg)	10	_ **

* % NRV - percent of the nutrient reference value; **NRV is not established.

How to use:

- ☐ Between seasons, when the body has to adapt to low temperatures, take **1 film-coated tablet per day**, with a sufficient amount of water, during the meal. It can be administered up to 8 consecutive weeks;
- ☐ In the case of a depressed immune system, **2 film-coated tablets are administered per day**, during the meal, in the morning and in the evening, in 15 day-cycles, with a break of 4 to 7 days.

C | Cardiovascular system

Therapeutic class
Cardiovascular
system

Therapeutic area
Vasoprotectives

Product type
Cosmetic

Pharmaceutical form:
Cream

Packaging
Box x 1 tube 20, 40,
100 g

Shelf life
3 years (zone II)

Benefits

- ☐ Fluxiv® tonic cream contributes to maintaining the elasticity, hydration and tonicity of the skin, ensures skin softening, protects its microcirculation, providing comfort and relaxation for your feet.

How does it help you

- ☐ active antioxidant that inactivates free radicals
- ☐ improves the hydration of the stratum corneum, reducing transepidermal water loss and maintaining skin elasticity
- ☐ calms the skin after prolonged sun exposure
- ☐ improves skin irritations: skin dryness, roughness, itching, erythema

Composition

D-panthenol (provitamin B5 or panthenol) maintains hydration, tonicity and elasticity of the skin by protecting its own hydrolipidic barrier and supports its regeneration.

Troloxerutin belongs to the vitamin P group, with antioxidant properties that contribute to maintaining microcirculation in good conditions, giving comfort and relaxation to tired legs.

The association of troloxerutin with D-panthenol, due to their antioxidant and regenerating properties, recommends the use of the cream also in case of prolonged sun exposure.

How to use

Fluxiv is applied on legs, in a thin layer, on intact and clean skin, 2-3 times a day, gently massaging from bottom to top until it penetrates the skin. Daily use is recommended. In case of prolonged sun exposure, apply the cream in a thin layer on the affected areas.

Fluxiv® tonic cream

Keeps your healthy blood flow

The background features a light gray pattern of interconnected hexagons and molecular-like structures, with some nodes highlighted in a darker gray.

Therapeutic class
Dermatologicals

Therapeutic area
Emollients and protectives

Product type
Cosmetic

Pharmaceutical form
Cream

Packaging
Box x 1 tube x 35 ml

Shelf life
4 years (zone II), stability studies ongoing

Benefits

- ☐ Favors hydration and regeneration
- ☐ Reduces itching and redness
- ☐ Protects the skin from various harmful external factors
- ☐ Reduces the negative effects caused by the sun's rays
- ☐ Maintains the integrity and health of the skin

Compositon

Active ingredients	
Ichthammol	offers superior benefits due to its antipruritic and antimicrobial action by keeping under control the growth of microorganisms on the skin
Zinc oxide	adsorbent properties, reduces irritation by rubbing or perspiration
<i>Hamamelis virginiana</i> extract	soothing properties due to its astringent and inflammatory qualities, improving the appearance of skin affected by redness and itching

How does it help you

- ☐ Cutaden® cream is a product for skin care with a complex of essential ingredients which provides daily care and protects the skin from various external irritating factors: minor wounds, insect bites, sun rays.

How to use:

- ☐ Apply a thin layer on clean skin 1-2 times a day and massage gently.

Cutaden® cream

Dermatologicals

Therapeutic area
Emollients and protectives

Product type
Cosmetic

Pharmaceutical form
Cream

Packaging
Box x 1 tube x 50 ml

Shelf life
2 years (zone II), stability studies ongoing

Benefits

- ☐ From the first day of life
- ☐ A protective formula that visibly reduces irritation and the baby's skin recovers quickly and becomes soft, smooth;
- ☐ Helps calm irritated skin and reduces redness, supports skin regeneration
- ☐ Protects against dampness
- ☐ Free from synthetic preservatives, fragrances, colorants

Compositon

Active ingredients	
Dexpanthenol	accelerates re-epithelialization and restores the skin's natural protective barrier
Zinc oxide	• forms a temporary protective barrier over the exposed tissues • astringent and adsorbent properties
Jojoba Oil	contributes to the repair of epidermal cells affected by the irritating process
Sweet almond Oil	provides essential vitamins for the optimal nutrition of the skin
Shea butter	protects the immature skin of babies from irritating factors
Vitamin E	antioxidant, reparative and protective properties

How does it help you

- ☐ Cutaden® bebe is a deeply nourishing, protective barrier cream which cares for the delicate skin of the nappy area and helps relief skin irritation due to diaper rash.

How to use:

Apply on the whole nappy area after careful cleaning and drying, as often as needed with every diaper change, especially at bed time or after prolonged exposure to a wet diaper.

Cutaden® bebe protective cream

Cosmetic

Pharmaceutical form
Cream

Packaging
Box x 1 tube x 50 ml

Shelf life
2 years (zone II), stability studies ongoing

Benefits

- ☐ Improves the skin's ability to retain moisture, providing additional hydration to the skin;
- ☐ Acts as a natural emollient, protecting and regenerating the deep structures of the skin;
- ☐ Balances the physiological pH of the skin and offers protection against itching or irritation;
- ☐ Seals the corneous layer of the skin, preventing water loss and protecting against skin xerosis;
- ☐ Favors the synthesis of lipids necessary to strengthen the epidermal barrier;

Compositon

Active ingredients	
Glycerin, urea	restores the water content in the stratum corneum
<i>Avena Sativa</i> kernel Oil	• relieves itching • interrupts the self-perpetuating cycle of itching and scratching
Phytoceramides Vitamin E	• contributes to the normalization of the lipid barrier • mediates hyperproliferation of keratinocytes
Dexpanthenol	accelerates re-epithelialization and restores the skin's natural protective barrier
Cera alba	• creates a hydrophobic barrier • reduces transepidermal water loss
Vitamin E	antioxidant, reparative and protective properties

How does it help you

- ☐ Cutaden® repair acts as an emollient cream, restoring the skin barrier, ensuring intense hydration, calming the inflammation, and itching of dry, atopic skin. Through its mild and moisturizing action, it strengthens the role of the skin's natural barrier, acting from deep within each structural layer of the dermis, intensively re-epithelializes and regenerates, visibly reducing the aspects of affected atopic skin.

How to use:

Cutaden® Repair cream is used daily, after the skin has been washed and dried with a soft towel. Apply a consistent layer on large areas or affected areas and gently massage until fully absorbed into the skin. Cutaden® Repair cream can be used on babies (+6 months), children and adults with sensitive, dry and atopic skin.

Benefits

- ☐ **Tinero® gel** is a seboregulator mattifying gel, for the daily care of seborrheic skin. Through the combination of nicotinamide and dexpanthenol, it has an emollient, sebum-regulating and antimicrobial action, contributing to the calming of seborrheic, acne-prone skin.

Compositon

Active ingredients	
Dexpanthenol 3%	• improves the hydration of the stratum corneum • reduces transepidermal water loss and maintains suppleness and elasticity of the skin.
Niacinamide 4%	• sebostatic effect • anti-inflammatory effect

How does it help you

- ☐ Reduces the excess of sebum
- ☐ Facilitates the removal of dead cells
- ☐ Favors the calming of irritated areas
- ☐ Contributes to the regeneration and hydration of the skin
- ☐ Reduces the imperfections
- ☐ Contributes to the prevention of blackheads formation

How to use:

- ☐ Apply to the affected area 2-3 times a day, after previous cleaning of the skin. Gently massage until completely absorbed.

Benefits

- ☐ nourishes, moisturizes, and calms the skin
- ☐ restores the integrity of the skin barrier
- ☐ can be used in conjunction with topical antiacne treatments that dry the skin
- ☐ helps decrease the sebum production
- ☐ soothes the inflamed skin and erythema
- ☐ minimizes the appearance of enlarged pores
- ☐ has a light, non-oily cream texture
- ☐ non-comedogenic, with mattifying properties
- ☐ dermatologically tested*

Compositon

Active ingredients	
Tea-tree extract	• antimicrobial properties against <i>Cutibacterium acnes</i> • antiinflammatory properties • antioxidant effect
Niacinamide	• normalizes sebum secretion • antiinflammatory properties
CERAMOSIDES™ HP	• natural oat lipid complex rich in ceramides, fatty acids and antioxidants • natural source, non-GMO • hydrates, restores the hydrolipidic barrier • protects against free radicals • decreases the diameter of the pores
Avena sativa lipophilic extract	• natural lipid complex from oat, rich in ceramides, fatty acids and vitamin E • restores the hydrolipidic barrier • prevents transepidermal water loss • contributes to the reduction of imperfections (blackheads, papules)
Hyaluronic acid	• hydrates by trapping water in the skin • improves skin elasticity

How does it help you

- ☐ TINERO® TT Drop cream helps to keep the skin moisturized without clogging the pores due to its light, oil-free texture, being specially formulated for blemish-prone skin.

How to use:

Use every morning and evening. Apply a thin layer, gently massaging until complete absorption into the skin.

Pharmaceutical form
Gel

Packaging
Box x 1 tube x 15 ml

Shelf life
3 years (zone II)

Benefits

- ☐ Softens and flattens the scars
 - ☐ Reduces itching and redness
 - ☐ Transparent
 - ☐ Self drying & waterproof
 - ☐ Odourless
- Forms a flexible & breathable film over the scar

How does it help you

- ☐ Siloderm® gel is non-sterile medical grade silicon-based gel for the management of hypertrophic and keloid scars through a triple mechanism:
 1. Protects the scar from external environment
 2. Reduces transepidermal water loss (TEWL)
 3. Normalizes collagenase activity by reducing capillary perfusion and angiogenesis

It is destined in the treatment and prevention of hypertrophic and keloid scars of different etiology, by flattening and softening scars that form after:

- surgical procedures including C-section, plastic surgery;
- cosmetic procedures;
- traumas;
- burns;
- injuries;
- acne or insect bites.

It can be used on new and old scars.
Suitable for children and adults.

Compositon

- ☐ polysiloxanes, trimethylsiloxysilicate, dimethicone crosppolymer.

How to use:

- ☐ Apply a very thin layer on the dry, clean skin. Apply only on closed wounds or after the scar has formed. Allow the gel to dry. Using too much gel will delay the drying process. For optimum efficacy, apply Siloderm® twice daily, for a minimum of 60-90 days, ensuring a continuous (24-hour) contact with the affected area. Longer treatments may be needed, if the scar is very old. After the film has dried, sun-screen or make-up products can be applied.

Amount needed

For scars between 7.5-10 cm in length, using the recommended application method, a tube should last for a complete treatment of 60-90 days.

The complete line for the long-term dermatocosmetic approach to ROSACEA

G | **Genitourinary system and sex hormones**

Therapeutic class
Genito Urinary System

Therapeutic area
Vaginal care

Product type
Medical Devices

Pharmaceutical form
Ovules

Packaging
Box x 1 blister with 5 ovules, 2 blister with 5 ovules each, 1 blister with 7 ovules , 2 blister with 7 ovules each

Shelf life
2 years

Benefits

- ☐ The product is used to maintain and restore the vagina's natural pH level, which does not favor the growth of pathogenic bacteria that can cause vaginal infections.
- ☐ This medical device can be used to prevent vaginal infections in women prone to such conditions and as a supplement to drug therapy in vaginal infections.

How does it help you

- ☐ Maintain and restore the vagina's natural pH level
- ☐ Stimulates the healing processes.

Compositon

Active ingredients	
Lactic acid	used to maintain and restore natural pH levels in the vagina
Vitamin E	used as pH - adjusting agent

How to use:

- ☐ An ovule is inserted deeper into the vagina once a day, preferably in the evening before bedtime.
Duration of administration is generally 7 - 10 days.
In women predisposed to vaginal infections, to maintain a constant vaginal pH level, the product can be safely used 3 times a week for a long period of time.

with 50 g of vaginal
cream and related
reusable applicat

Shelf life
2 years

Benefits

- ☐ Prevents the vaginal flora imbalances by maintaining normal vaginal ph (pH<4.5)
- ☐ Restores the normal vaginal environment which no longer allow the growing of unwanted anaerobic germs responsible for the development of various vulvo-vaginal diseases, even during pregnancy
- ☐ Reduces / relieves symptoms of vaginal dryness that can occur for several reasons: the aging process, hormonal therapies, the decrease in estrogen secretion, the use of contraceptives, in various vulvo-vaginal diseases (vulvitis, vaginitis) manifested by: itching, redness, inflammation
- ☐ Helps in the regeneration process of the damaged mucosa after birth, gynecological-surgical procedures, following chemotherapy and radiotherapy
- ☐ Reducing discomfort after painful intercourse
- ☐ Treatment and prevention of atrophy of the vaginal mucosa

How does it help you

- ☐ Treatment and prevention of vaginal dryness
- ☐ To restore the physiological vaginal microflora
- ☐ Treatment and prevention of atrophy of the vaginal mucosa
- ☐ Treatment of damaged vaginal mucosa.

Compositon

Active ingredients	
Lactic acid	used to maintain and restore natural pH levels in the vagina
Sodium lactate	used as pH - adjusting agent
Sodium hyaluronate	used as moisturizer

How to use:

- ☐ The vaginal cream must be applied once a day, preferably in the evening before bedtime.

Zifelle® hydra vaginal cream is used in combination with a reusable vaginal applicator (5 g), as accessory (a quantity of 5 g of vaginal cream is used for one application).
